

It is great to have VRS technology being utilized by Deaf Community. For those under poverty-line category or those dependants of SSI financial sources, it is still very difficult to afford the monthly payment for use of cable or other method to obtain that VRS technology be applied in our home. When I get a job that place me above-poverty category of earning a living economy, I will afford that kind of service and technology. Thanks for listening to my support for VRS technology to be used by Deaf Community. Sincerely, Pearl Swan Youth
